

The one parcel TMS platform every 3PL needs to master cost control in a volatile, dynamic market

Fast carrier label printing? Check. But controlling how, when, and where to use carrier services profitably, while meeting client SLAs, gives you a critical competitive edge.

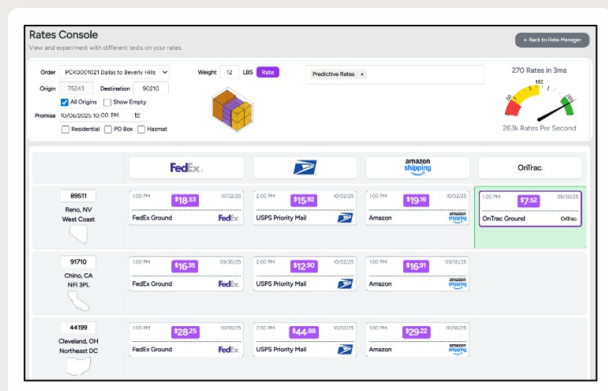

Create and Manage Rate Cards

- Markup or discount base sell rates, surcharges and fees
- Apply rate cards based on clients, products, or DCs
- Use rate cards to generate RFP quotations
- GRI rate cards to accurately measure cost impact

Configure Flexible Business Rules in Minutes

- Ensure cost-effective cartonization and packing
- Data-driven diversified carrier selection criteria
- Monitor primary carrier incentive discounts
- Machine learning predictive EDD and delivery costs

High-Speed Optimization Engine

- Calculate 1,000s rates, EDD, and business rules/second
- Eliminate reliance on slow carrier rating APIs
- Enforce cost-effective decision from order to invoicing
- Provide clients with proactive shipping cost estimates
