

Reduce margin erosion by controlling parcel decision intelligence from pre-order to invoice

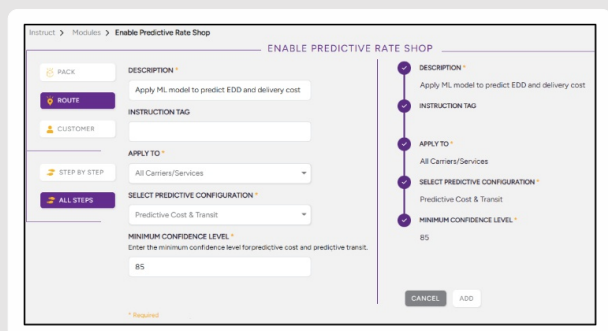

Rising parcel delivery costs and complex carrier pricing models are cutting into retail profits. Sendflex TMS provides the cost controls you need to protect your bottom line.

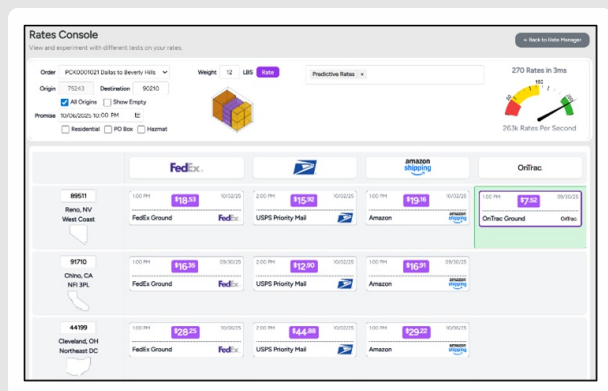

Create and Manage Rate Cards

- Easily configure shipping charge markups or discounts
- Apply rate cards based on customer, product, order value
- Apply charges in digital storefronts and ship confirmations
- Verify carrier API rate with contract rates during shipping processing ("pre-audit")

Configure Flexible Business Rules in Minutes

- Ensure cost-effective cartonization and packing
- Data-driven diversified carrier selection criteria based on SKU, delivery area, customer preference, and more.
- Monitor primary carrier incentive discounts
- Machine learning predictive EDD and delivery costs

High-Speed Optimization Engine

- Calculate 1,000s rates, EDD, and business rules/second
- Instant rating and delivery results in shopping carts
- Rate shop hundreds of DC's, stores, and drop ship supplier origins in milliseconds
- Stop depending on slow, unreliable carrier rating APIs
